

colofer® ROBUST

More than just extremely resistant to scratching

Nomen est omen. colofer® ROBUST is a well established product that has stood for excellent scratch resistance for many years.

Thanks to its innovative surface structure and in spite of a layer thickness of just 25 µm, colofer® ROBUST convinces with a much higher resistance to scratching than comparable products and protects your drainage system against mechanical damage during assembly/installation and use.

Convincing advantages:

- » Good forming properties
- » Very good resistance to scratching (30 N)
- » Highest UV resistance category class (RUV 4*)
- » Guaranteed up to an altitude of 2,100 meters

Typical applications:

- » Roof applications
- » Standing seam roofs
- » Gutters and tubes
- » For sheet working

 Our colofer® technical support consists of a large pool of experts who will be happy to assist you with all your inquiries.

Premium quality
with reduced carbon footprint

colofer®
greentec steel

Properties	Testing standard/Inspection requirement	Typical values
Coating thickness	EN 13523-1	approx. 25 µm
Color	EN 13523-3	upon agreement
Gloss (60°)	EN 13523-2	approx. 20
Adhesion after cupping	EN 13523-6	6 mm Gt0B
Adhesion after bending	EN 13523-7	≤ 1 T peel adhesion
Crack formation during bending	EN 13523-7	≤ 3 T free of cracks
Scratch resistance	based on EN 13523-12	≥ 30 N
Temperature resistance (during use)	-	from -20 to +80 °C ¹⁾
Resistance to humidity » Continuous humidity test	EN 13523-25	Test duration: 750 h No formation of blisters on surface
Corrosion resistance » Salt spray test	EN 13523-8	Test duration: 360 h Average creepage (scratch to Zn): 2 mm max., no formation of blisters on surface
Corrosion protection class	DIN 55928-8: 1994	K111
Corrosivity category on Z275/ZM120 substrate	DIN 55634: 2018	C3
RC category	EN 10169	RC3 on Z275 or ZM120
CPI category	EN 10169	CPI 4
UV resistance category ²⁾	EN 10169	RUV 4*
Surface appearance	-	structured
Fire classification	EN 13501-1	A1

* only applies to selected standard colors

All testing standards are the most recent version as long as a year is not indicated.

- 1) No delamination of coating on even surfaces throughout guarantee period for coating adhesion. Color shades will change as a result of long-term stress at high temperature.
 2) UV resistance category depends heavily on color. The respective RUV class is achievable only for colors noted in table „Overview of color shades“ in the Technical Terms of Delivery for colofer®. Additional colors upon request.

1) This guarantee between voestalpine and its direct customer shall be governed by and construed in accordance with Austrian law (with the exclusions of its conflict-of-law provisions and the UN Convention on Contracts for the International Sale of Goods of 11 April 1980 - CISG) and only valid in connection with the respective regulations of most recent version of the colofer® guarantee provisions applying at the time of the order confirmation by voestalpine.

OUR PATH TO A GREENER FUTURE

Premium products in the greentec steel Edition

With greentec steel, voestalpine is pursuing an ambitious step-by-step plan in the long-term decarbonization of steel production. The declared objective is to achieve carbon-neutral production by 2050, and the initial steps have already been taken. Process-optimized production operations already prevent up to 10% of the direct CO₂ emissions at the Linz site. The material and processing properties of the steel are not affected in any way in this production route. Each voestalpine steel strip product is available in premium quality in the greentec steel Edition with a reduced carbon footprint and unique benefits.

Premium quality with reduced carbon footprint

colofer®
greentec steel

Organic-coated steel strip – greentec steel Edition

Max. carbon footprint 2.23 kg CO₂e per kg of steel ¹⁾

¹⁾ per EN 15804+A2 (EPD methodology) cradle to gate

All products, dimensions and steel grades listed in each voestalpine supply range are available as greentec steel Edition.

All values reflect the current status of our experience and knowledge. Slight deviations may occur as a result of specific color and sheet thickness.
